

Move Right for Sirens and Lights

When the fire department is called to an emergency it is important that we respond quickly and safely.

If you are driving down the road and see the lights and sirens of an emergency vehicle in your rearview mirror, **move to the right and stop** to allow emergency vehicles to move easily down the roadway. Once the emergency vehicle have passed merge back into traffic when it is safe to begin driving.

Every time fire engines and aid cars are called to an emergency, Fire Fighters are giving their all to help others. Do your part as a driver to help Fire Fighters do their jobs as quickly and safely as possible.
